V150 Swim Spa & Party Vessel
The Ultimate Swim Spa Experience!

The family that swims at home stays at home

Backyard aquatic exercise is great for all types of people. The active swimmer loves the convenience of a workout swim right at home. The fitness lifestyle person loves the strength and conditioning benefits from working out suspended in water. Folks who need to rehab joints or muscles, or other medical concerns, benefit from both the warm water and gentle resistance movement deeper depths can provide. The family with kids or grandkids just loves to have so much water to play in...year-round, no matter what temperature it is outside! So whether you want a rigorous swim, a supportive workout, or a playful escape, check out our great Aquatic Training Vessels and Vector21 Swim Spas to add to your aquatic life!

AQUATIC TRAINING VESSELS

Faster. Fitter. Fiercer.

ME + MY ATV

"I use my backyard ATV as a powerful weapon against pain, and my doctors recommended warm water therapy to help reduce the effects of painful, bone-on-bone arthritis."

~ Tammie S, MA

The Only Swim Spa to Meet All Your Needs

Aquatic training is an important and vibrant part of the sports, fitness and health, and wellness disciplines today. Whether you are motivated by competition, conditioning, injury recovery or simply seeking a better balance for your health, a water-supported environment is a perfect solution. It's where you can immerse your body and improve your performance without the forces or strain found in running or other aerobic activities. But for most people, access to a water location you can use regularly, effectively and affordably in your daily life has always been a challenge. Until now.

ELEVATE YOUR SWIM SPA EXPERIENCE

As an industry leader in hydrodynamic performance products, we have developed an innovative new vessel for your aquatic activity and enjoyment.

Introducing the Aquatic Training Vessels™, or ATV. Our patent pending ATV elevate your swim spa experience and are personal workout and health products for your daily life. In ATV, swim strokes, leg kicks, resistance movements, and low-impact range of motion exercises are all options for your active efforts and healthy life. They can also just be a place to kick back and float away stress or laugh and play with the kids. ATV are true action vessels for your whole family to enjoy all year-round.

POWERED FOR PERFORMANCE

ATV are much more than traditional swim spas. Hydrodynamic high-flow design and control is our specialty, and a unique range of pumps and jet arrays deliver water flow you can customize for your optimized aquatic workouts. A standard 50A / 60 Hz (32A / 50 Hz international) electrical service powers three independent 160 gpm (606 lpm), two-speed pumps in the ATV-14 Sport and ATV-17 Sport to deliver a full spectrum of water flow options. The ATV-14 Splash operates off of a single 160 gpm (606 lpm) two-speed pump for a gentler flow in your aquatic activity. The ATV-17 Kona steps up to two 360 gpm (1,363 lpm) two-speed pumps plus one 160 gpm (606 lpm) pump. ATV are equipped with pumps that generate flows which may be customized to challenge every level of swimmer and type of aquatic workout regimen.

ROOMY, OPEN & ELEGANT

The innovative bowed sidelines to the ATV are more stylized than a typical swim spa box of water. They allow for a more spacious swim and workout space than comparable rectangular swim spas. Whether your body position is horizontal while swimming, vertical during aerobic exercise, or seated in resistance and strength workouts, the vessel area accommodates greater space for mobility and workout freedom without kicking or banging into walls. The ATV-14's true 48 inch (122 cm) water depth allows for a full torso range of exercises when immersed in the water. The ATV-17 offers an additional 3 feet (91.4 cm) of length and 5 inches (12.7 cm) of water depth for even greater space and torso immersion for full body aquatic workouts. Professional physical therapists, in particular, recommend the greater water depth for optimized therapy. The open, level floor area is lightly textured for more stable footing during aerobic workouts.

ME + MY ATV

“Daily swimming and exercising in warm water has made a huge difference in my life. My bone and joint pain has decreased and my balance has improved. I am thrilled that I have found an outlet that lessens the pain and gives me so much pleasure.”

~ Karen S, WI

Splash, Swim, Train: We’ve Got This

ATV™ also feature our famous high-flow hydrotherapy jets and flow controls in seat locations for leg and torso massage. Utilizing high-flow, low-pressure massage action, a therapeutic deep seat and a post-workout cooldown seat offer important muscle and soft-tissue massage benefits.

SAFE FOOTING IS A PRIORITY

For safe and secure footing while transitioning in and out of the vessel, the interior steps are built to ANSI/APSP/ICC-6 safety stairs specifications. Unlike slippery acrylic surfaces that can prevent stable footing the stairs and the vessel floor have a smooth yet tactile surface treatment to allow for optimal water aerobics footing and non-slip navigation of the stairs. For better visibility, LED lighting along the steps is standard.

SIMPLY PRISTINE

We have a reputation for pristine water management. ConstantClean™ with corona discharge ozonator, SmartClean™ automatic cleanup cycles, and anti-microbial treated filters work with a simple sanitation process to allow for weeks and months of continuously clean water.

BUILT LIKE A TANK & LASTS A LIFETIME

ATV are made with bonded polymer resins for the strongest vessels in the swim spa industry today. The covalently-bonded macromolecular structure makes the vessel impervious to the crazing and cracking found in typical acrylic swim spas. The state-of-the-art polymer resins are used in the marine industry’s most expensive and rugged boat and yacht hulls. The sweeping ATV lane lines and other visual focal points for your workouts are not superficial appliqués that can peel or degrade over time, and no tile to lift off or grout to discolor. They are securely bonded into the polymer structure of the resins and last as long as the vessel itself.

Traditional swim spas struggle to sustain structural strength with the potential for acrylic sheet to waver and distort during shipping and installation, and under the weight and pressure of so much water over time. The ATV external frame is a unibody gusset construction that assures greater structural integrity and rigidity to further support the vessel’s bonded polymer resin strength. Truly, ATV are the strongest large aquatic vessel you can own for your fitness and wellness activities.

TETHERS, ROWERS, MUSIC & MORE

ATV activities may include anything from free swimming and water aerobic exercises, as well as use of the standard feature swim tether, or optional Resistance & Rowing Kit attachments, or Aqua Aerobic Step.

Crank up the audio option with Bluetooth, sub-woofer, USB port and floating remote to work out to your favorite music. Add sub-waterline LED multicolored lighting to bring additional sparkle to the water. Or choose the ATV fountains’ 12-point water feature option for beautiful arcing streams of water along the vessel walls.

AQUATIC TRAINING VESSELS

Let's show you!

VORTEX FILTRATION SYSTEM
Dual filtration system includes 180 ft² of filter surface to clean all contaminants and debris

KONA WHITEWATER-4 JETS
Provide a wall of water to maximize your swim pace and rigor, or Turbo jets in other models

AIR CONTROL VALVES
Dial in the force of the Whitewater-4 jets with individual air control valves

TWIN-END TETHERS
Swim tethers are conveniently located on most models to allow you to swim with or without flow

GRAB BAR
Swimming in place without a tether is a breeze with the use of the stainless steel grab bar

CONSTANTCLEAN WATER MANAGEMENT
SmartClean with automatic cleanup cycle and optional Ozonator produces pristine water

made in USA

MADE IN AMERICA
Proudly made in the USA by an employee-owned company

ME + MY ATV

"I like the current and it's rewarding to be able to actually swim in place. It has helped me with sleep."
~ Vicki, AZ

Whitewater-4 Jets: Feel the Flow

Innovative Whitewater-4™ jets in Kona provide a wall of water to maximize your swim pace options and workout rigor. Class 4 white water is known as 'advanced' in the outdoor sports world. With Kona's Whitewater-4 jets, you will feel the flow difference...for real.

WHITEWATER-4 JETS = MORE FLOW

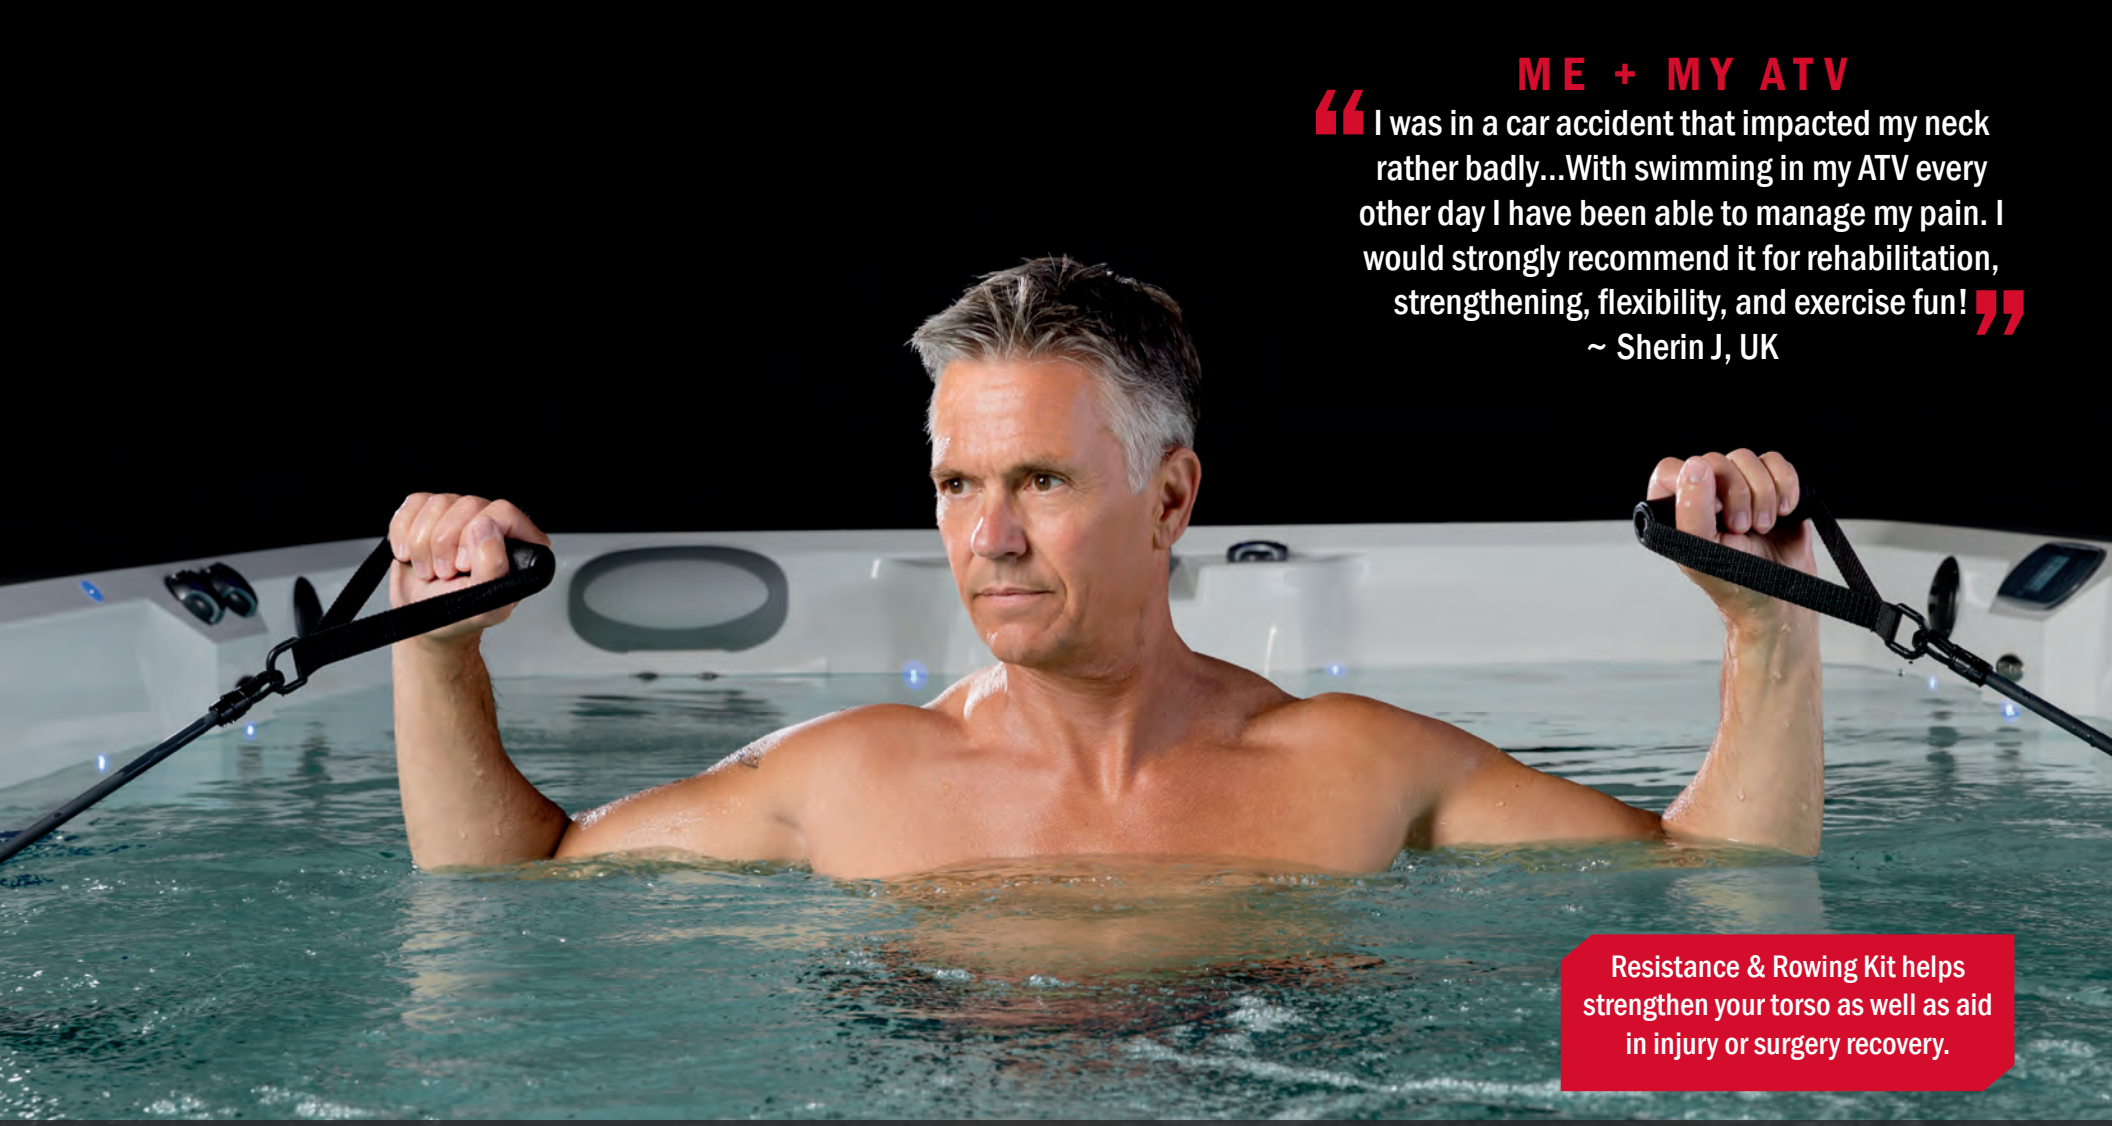
The Kona's system design actually uses the Whitewater-4 jets to deliver water flow beyond the volumes created by the pumps, delivering up to 39% more flow than comparably sized jets available anywhere else in swim spas or hot tubs.

BUOYANCY JETS GIVE YOU LIFT

In the Kona, a third 160 gpm (606 lpm) pump powers the therapy seats and our revolutionary Buoyancy Jets. The Kona offers a paired mid-vessel Buoyancy Jet feature that provides mid-to-lower torso lift during swim exercises. This provides a unique alternative dynamic to your body position in the water during your workout making it easier to stay afloat. Twin-end tethers and deep-water anchor points expand the versatility and variety of strength, resistance bands and conditioning workouts in 53 inches (135 cm) of water.

ME + MY ATV

"I was in a car accident that impacted my neck rather badly...With swimming in my ATV every other day I have been able to manage my pain. I would strongly recommend it for rehabilitation, strengthening, flexibility, and exercise fun!"
~ Sherin J, UK



Resistance & Rowing Kit helps strengthen your torso as well as aid in injury or surgery recovery.

Let's Get Serious About Wellness

With your body immersed in water, improve your health performance without the impact of land-based exercises. Aquatic training takes the pressure off bones, joints, muscles, and tendons, which can help with injury recovery. Health professionals recommend regular aquatic training because it supports sore limbs and can decrease swelling and inflammation and increase circulation. It also helps improve your strength and fitness stamina, as well as your range of motion. Plus, it aids with sore and stiff muscles and helps people with conditions such as arthritis, fibromyalgia, and other musculoskeletal conditions. Let's address your needs.

BENEFITS OF SWIM SPA TRAINING

- **Decreased joint inflammation**
- **Improved range of motion**
- **Decreased tissue inflammation**
- **Lower stress levels**
- **Muscle relaxation and pain relief**
- **Improved strength**
- **Increased circulation**
- **Pain management**
- **Cardiovascular health**
- **Improved sleep**
- **Overall health and wellness**

Let's compare!

ATV-14 SPLASH

ATV-14 SPORT

Go to ATVswimspas.com and watch the free videos!

The ATV-14 Splash satisfies the water enthusiast who wants a less intense swim and enjoys stretching, soaking and splashing. It's equipped with a single swim tether point and a resistance rowing option to provide for versatile activity or relaxation in your lifestyle. A single tether is used for swimming against the flow.

ATV-14 SPLASH SPECIFICATIONS

	US/CA	International
size	168.5 x 89.5 x 56 in	428 x 227 x 142 cm
water depth	48 in	122 cm
weight dry/full	2,140/16,526 lb	971/7,496 kg

V150 Swim Spas

Not every swim spa emphasizes workouts and swim stroke development. Some are designed for more social interaction and fun. Maybe it's party time with your friends. Maybe it's special time with the kids. Choose between the V150P Swim Spa and Party Vessel or V150W Swim & Workout Vessel!

Swim, splash or play a little footsie: the V150P swim spa loves to party!

Vector21's V150P is a next-gen vessel with the Vector Optimized Laminar Therapy (V-O-L-T™) System of V^3 throttle control and futuristic Jetpods that put you in command of your experience. The same Whitewater-4™ jets from the ATV Kona also add a powerful punch. It's a full throttle experience in a super party tub!

The generous size features eight ergonomic seats for party animals to congregate in comfort. Plus, the length and true 43 in (109cm) swim depth allows the recreational swimmer full range of motion and plenty of splash area for the kids and kids-at-heart.

V-O-L-T SYSTEM THROTTLES CONTROL

The V-O-L-T System is the new command and control for hydrotherapy and adjustable hot tub or swim spa performance. Pumps generate the flow, the Variable Velocity Valve™ (V^3) throttle targets and channels the performance to specific seats and swim jets, and V150P Jetpods and Whitewater-4 jets deliver the action. Convenient pushbutton electronic navigation keeps "all systems go" on the course you set.

The V-O-L-T hydrotherapy system is buried deep inside the V150P vessel and activates power from one two-

ME + MY V150P

"It's the perfect excuse to bring all generations together to just laugh, play and have fun, right at home! The swim spa has really been a great investment for our family."
~ Sarah C, OR

speed, 160 gpm (606 lpm) pump on the swim end and one 2-speed, 360 gpm (1,363 lpm) pump for the therapy seats. The output from the pumps maximizes laminar flow. Laminar flow delivers maximized flow volumes and significant hydrotherapy benefits because there are no cross-currents, no eddies, nor swirls of water to impede flow.

WHITEWATER-4 JETS = MORE FUN

The three Whitewater-4™ swim jets produce 160 gpm (606 lpm) of flow that recreational swimmers will enjoy. Plus, the flow is adjustable up or down to your specific needs. Even young swimmers can delight in the variable current.

High-flow, low-pressure engineering assures great therapy without punishing pressure. The Directional Jetpods target precise muscle locations for the deepest massage. Orbital Jetpods deliver a paced rotating surface action, more like a sport massage style, focusing movement over the skin surface and shallow tissue below. Conal Jetpods deliver a more gentle, Swedish massage movement over the skin surface delivering a relaxing release.

Just throttle the red V^3 valve and two Whitewater-4 jets create thundering explosions of power from the bottom of the swim spa that can move the entire water content into enormous flows of hydrotherapy. This extreme water flow is especially effective to relieve foot and leg pain.

The V150W swim spa is your personal aquatic fitness center!

Vector21's V150W swim spa has all the attributes of the V150P, however the focus is on providing ample space to swim, row, jog, cycle and workout. It's a personal aquatic multi-use gym, perfect for any age and fitness level – you can tailor your aquatic workout with less impact on your joints, tendons and bones.

Over 12 feet (365.8 cm) of length offers all the flexibility you need to elevate your health and wellness. Plus, the true 43-inch (109 cm) swim depth allows the advanced swimmer full range of motion and plenty of area for a challenging workout. You get the portability of an above-the-ground pool, the limitless swimming of a lap pool, and the hydrotherapy of a hot tub all rolled into one.

Imagine swimming or jogging in place against four Whitewater-4™ swim jets with a collective 520 gallons per minute (1,968 LPM) flow. Pure exhilaration with true health benefits!

WARM WATER THERAPY ASSISTS:*

- **Arthritis**
- **Fibromyalgia**
- **Osteoporosis**

- **Joint replacement**
- **Lower back pain**
- **Sports injuries**

* Consult with your health specialist

ME + MY V150W

“I train year-round for Ironman® triathlons and can really use this swim spa to extend my workouts beyond the gym. Adding the bike to the spa is an extra bonus!”

~ Colin O, OR

AQUABIKE SPINNING IN THE SPA

The Aquabike Professional takes adjustability and interval training to new levels. With multiple resistance levels and adjustable positioning, this bike offers the maximum fitness experience.

Handlebars and saddle are adjustable for correct body positioning and targeted workout. Plus, variable settings for three grades of resistance dial in your experience, without the pushy coach!

PRE- OR POST-WORKOUT SPA

Whether it’s time to warm up or cool down, the V150W has the perfect seat for all. It features four therapy seats – two corner seats at various depths feature neck to thigh Jetpods; two side seats of variable heights also include Jetpods at floor level to work on your tight leg muscles and tired feet. With 21 Jetpods you can customize the feel of your massage – Deep-Tissue, Relaxation, Shiatsu or Swedish Massage Jetpods are interchangeable to deliver precise hydrotherapy to all the right spots.

Variable Velocity Valves™ (V3™) are the primary flow-control system, located near each seat they activate. Throttle from 0 to 100 percent of the pump’s water flow to the specific seats – it’s simple to understand, operate and exclusive to Marquis® Vector21 hot tubs and swim spas.

Feeling is believing – see your local Dealer to experience the V150W for yourself, or view the video online.
